

Follow the steps below to build the paper airplane.

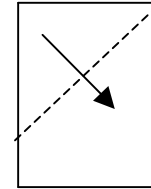

1

Fold paper in half vertically to make a crease. Unfold.

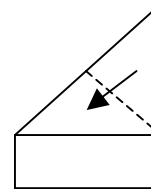

2

Fold the top left corner to a point 2 ½ inches above bottom right corner on right edge of the paper.

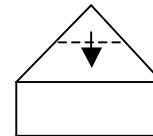

3

Fold the top right corner to a point 2 ½ inches above the bottom left corner on left edge of paper.

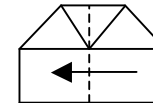

4

Fold top point of paper down to a point in the center of the paper 2 ½ inches above the bottom of the paper.

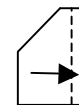

5

Fold paper in half vertically.

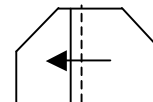

6

Fold the left edge of the top half of the paper from left to right on a line that is ¾ inch from right edge.

7

Flip plane from right to left and fold right edge of the paper from right to left on the line in the step above.

Follow the steps below to launch the paper airplane.

Hold the plane about 5 feet from the floor. Hold your arm steady and throw the plane forward with only a wrist motion.
